BONGO'S BINGO

Customer Case Study

Building cyber resilience across a fast-growing global entertainment brand

Introduction

How Amicis Group helped Bongo's Bingo create a secure, resilient and scalable cyber environment across its international operation.

Entertainment & Live Events

40 VENUES

50 USERS

50 ENDPOINTS

Challenges & Objectives

Growing brand. Growing cyber complexity.

Rapid international growth meant Bongo's Bingo needed its cyber security and technology governance to keep pace with the business.

Its distributed operation created challenges around visibility, device management and consistent security controls.

Challenges

- **Fragmented controls** - Across global venues
- **Limited Visibility** - Across distributed endpoints
- **Inconsistent Device Management** - And policy enforcement
- **No centralised threat detection**- Or continuous monitoring

Objective

Create a secure and scalable cyber framework capable of supporting Bongo's continued international growth.

The Amicis Group Solution

Amicis implemented **CyberGuard**, providing Bongo's Bingo with centralised visibility, protection and governance across its distributed operation

Managed Detection & Response

Continuous threat monitoring and response

Penetration Testing

Identifying and reducing exploitable risk

Vulnerability Management

Continuous scanning and regular penetration testing

Cyber Awareness

Helping employees recognise cyber threats

Mobile Device Management

Consistent device management and security policies

THE RESULTS

40 VENUES

Operating within a consistent security framework

50 USERS & ENDPOINTS

With centralised visibility and protection

ONE WEEK

To establish full cyber visibility

Centralised Resilience

From fragmented controls and limited visibility, Bongo's Bingo now has a more secure, unified and scalable cyber environment.

A scalable cyber framework supporting continued international expansion
